03

**Go-Live:** How does the transition to Secure Release Order work?

04

**Preparations:** What happens after registration?

## The current import process requires a release reference (PIN).

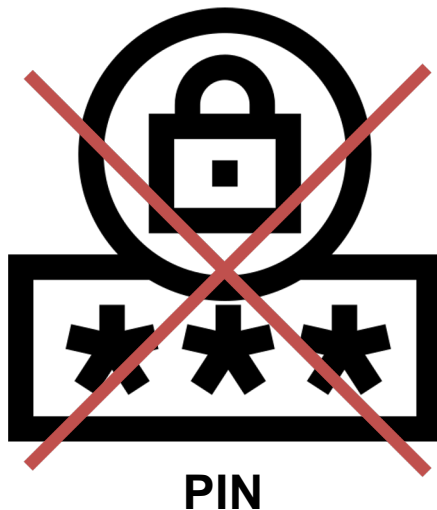

# The release reference (PIN) will be abolished from 01.10.2025 and replaced by a digital Pick-Up Right.

This will be a **legal obligation** from 1 October 2025!

Due to increasing security gaps in the import process, the Port Security Act has been amended – the release reference (PIN) will be abolished.

### Insecure

Currently, the old process involving an unsecured release reference (PIN) poses a significant **safety risk for both employees and customers.**

### Untraceable

The chain of authorised parties is currently neither logged nor registered anywhere. This results in **container pick-ups being untraceable for authorities.**

The amendment to the *Port Security Act* eliminates the use of PINs and introduces a secure release order process.

DAKOSY & dbh are creating a secure, standardised collection process in accordance with the requirements of the Port Security Act through SRO.

**DAKOSY** dbh

**Hamburg,  
Bremerhaven und  
Wilhelmshaven**

### Increased safety

The digitalisation of container releases increases **security for employees and customers.**

### Increased traceability

The chain of authorised parties is logged in German Ports, which makes **container pick-ups traceable for the authorities.**

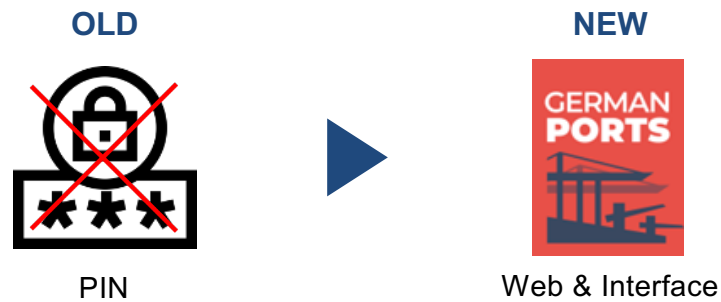

### Standardised processes

The creation of a new platform will further **standardise the import processes** at German ports for Hamburg, Bremerhaven and Wilhelmshaven.

**DAKOSY** dbh

The release reference (PIN) will no longer be used and will be replaced by a digital Pick-Up Right.

**This is a legal obligation starting from the 01 October 2025!**

04

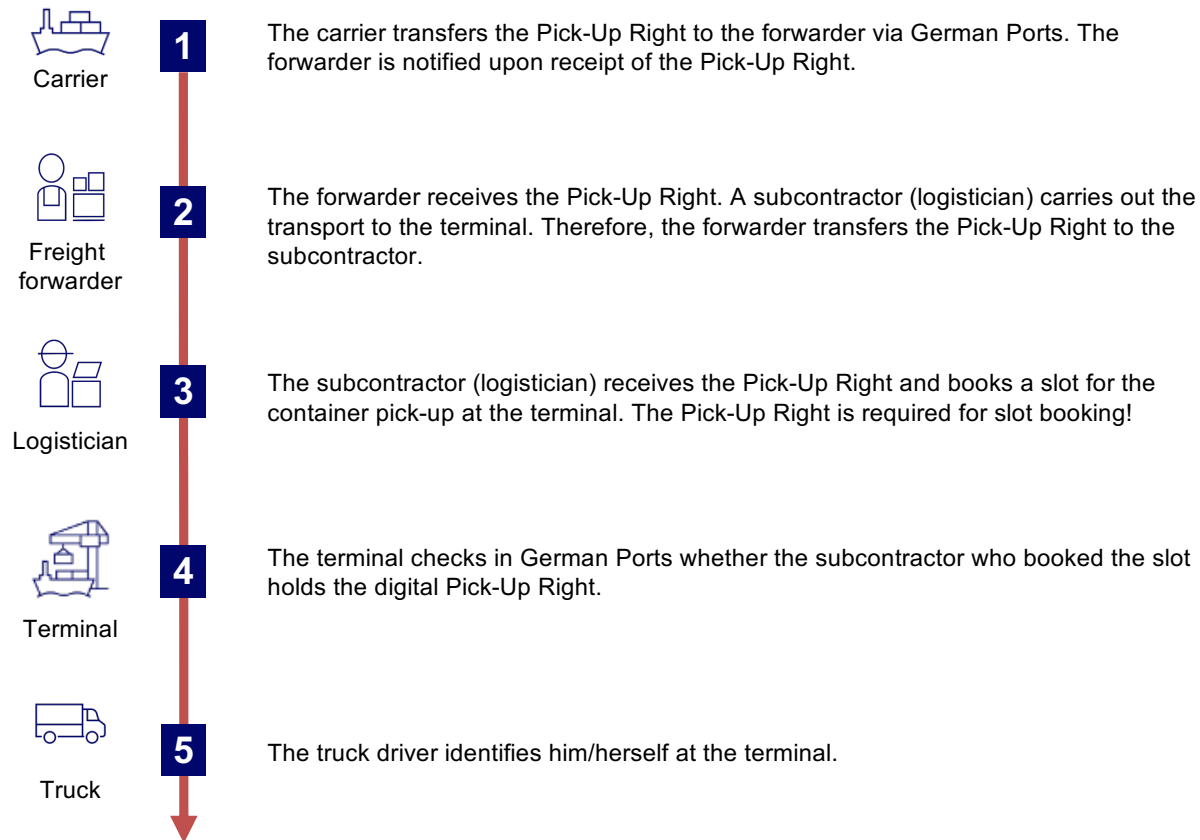

**Preparations:** What happens after registration?

# German Ports creates digital Pick-Up Rights from release orders.

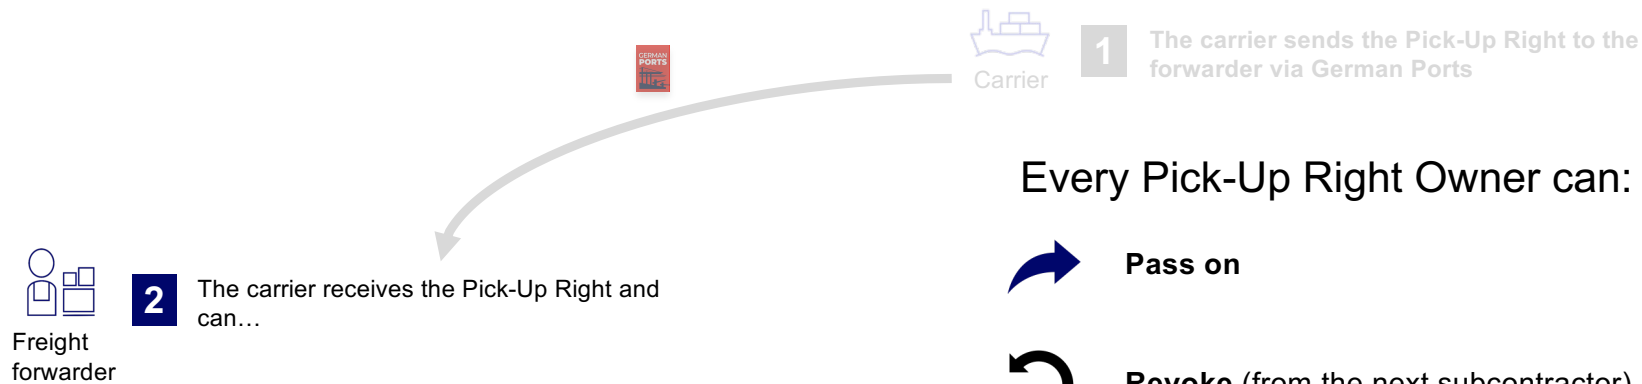

# This is how the transfer of Pick-Up Rights works:

## Transfer of a Pick-Up Right in **German Ports**

## The use of Pick-Up Rights reflects today's operational processes.

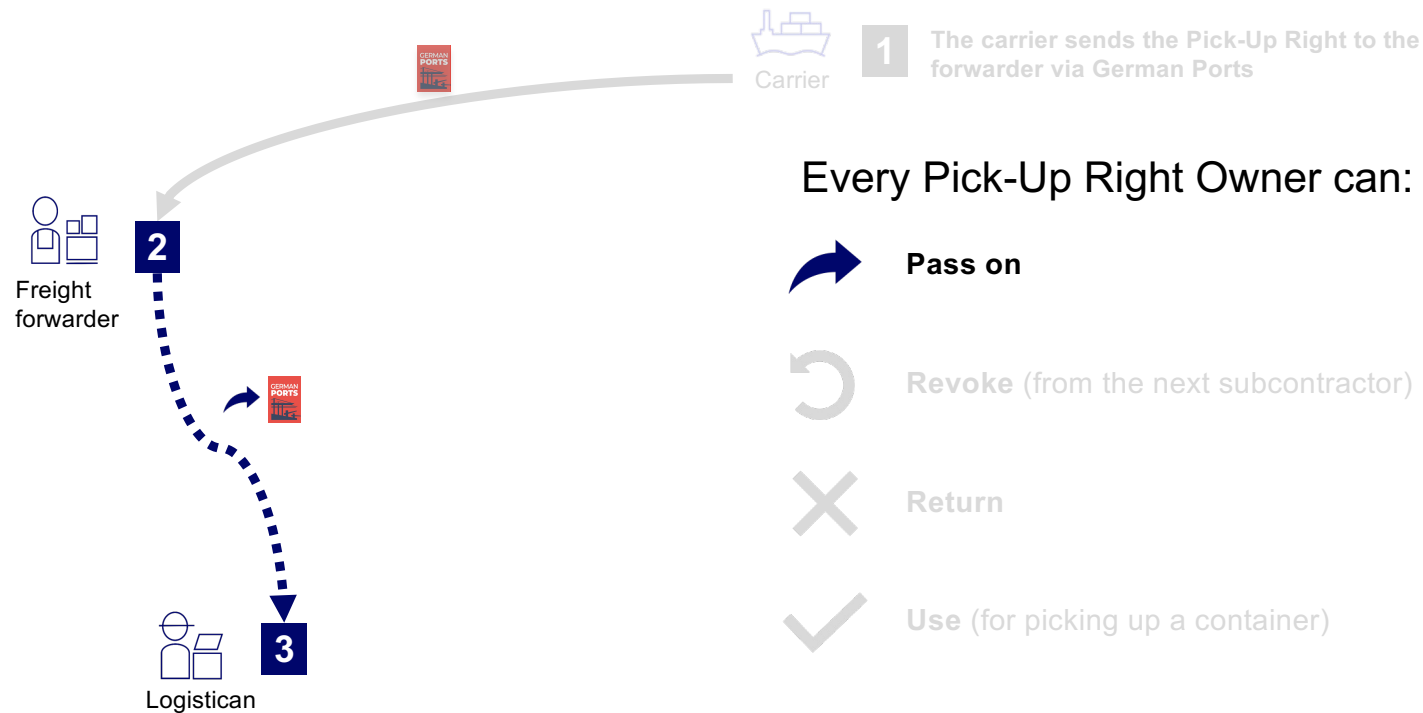

Every Pick-Up Right Owner can:

-  **Pass on**
-  **Revoke** (from the next subcontractor)
-  **Return**
-  **Use** (for picking up a container)

... a Pick-Up Right

# For freight forwarders and logisticians, the passing on of the Pick-Up Right will be mandatory.

Every Pick-Up Right Owner can:

-  **Pass on**
-  **Revoke** (from the next subcontractor)
-  **Return**
-  **Use** (for picking up a container)

... a Pick-Up Right

For freight forwarders and logisticians, the passing on of the Pick-Up Right will be mandatory.

## How is the Pick-Up Right used per mode of transport?

### Truck

#### TR02-Slot booking

When booking a slot, the company placing the booking must have the Pick-Up Right.

A slot can only be booked in TruckGATE if there is an active Pick-Up Right and the driver ID has previously been entered for the container in German Ports.

### Rail

#### Railway operator

For container collection, the railway operator must have the Pick-Up Right.

### Barge

#### Barge operator

For container collection, a valid Pick-Up Right must be available for the barge operator.

01

**Introduction:** What is changing and why?

02

**Basics:** How does Secure Release Order work?

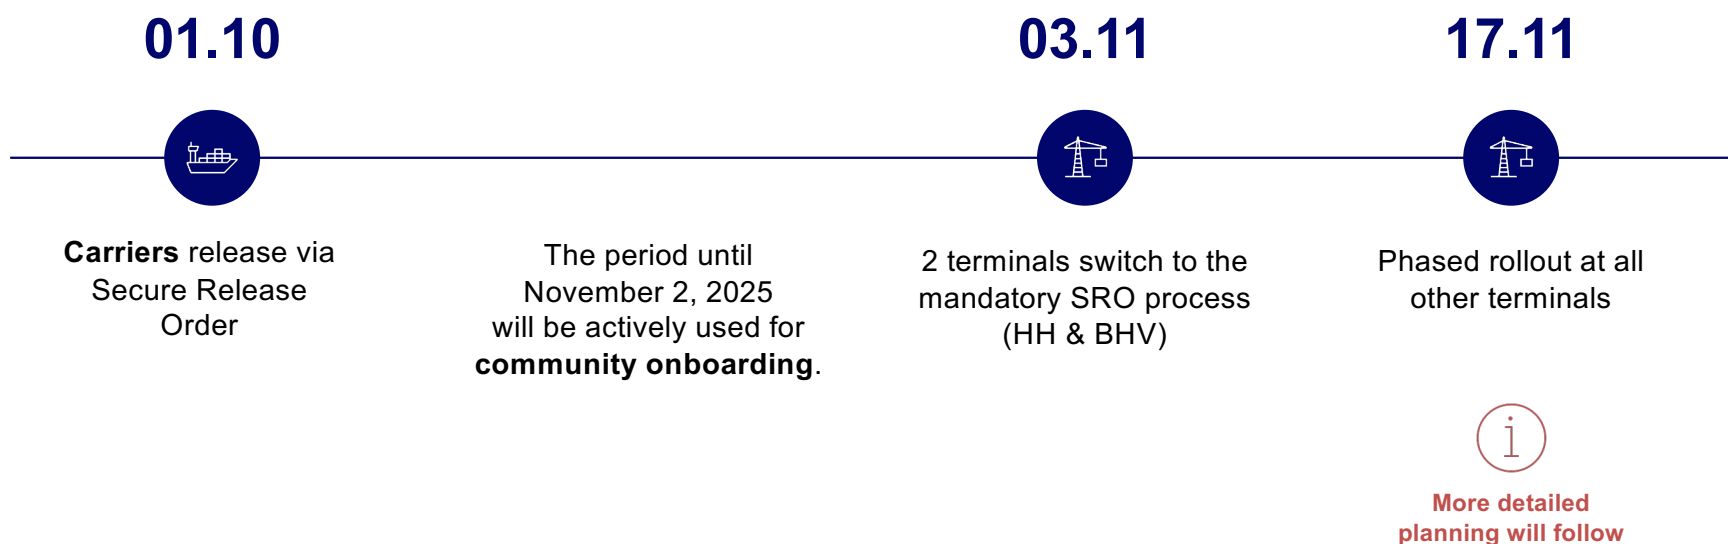

03

**Go-Live:** How does the transition to Secure Release Order work?

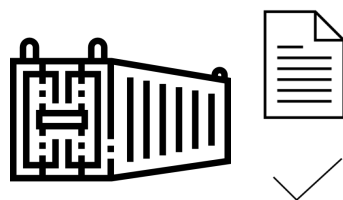

04

**Preparations:** What happens after registration?

To minimise risks, a gradual introduction of SRO has been coordinated with the terminals.

On October 1, 2025, the Secure Release Order process will start with the carriers. For all other parties involved in the process, a “Downgrade to PIN” remains possible on a transitional basis, so that the PIN-based process can continue to be used.

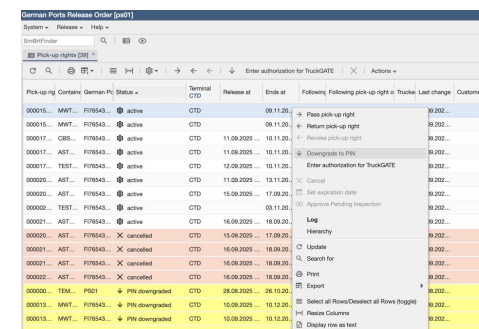

## Release order

Carriers create a release order that is transmitted to German Ports.

## Pick-Up Right

German Ports will create a Pick-Up Right for the respective container.

Pick-up right	Container	German P.	Status	Terminal CTD	Release at	Ends at	Following	Following pick-up right	Truck	Last change	Customer ref

## Downgrade to PIN

As soon as the receiving party has the Pick-Up Right, a PIN can be generated for the pick-up of the container.

## If you receive Pick-Up Rights from a carrier as the Initial Release Party.

- ✓ You will have to register before the 01.10.
- ✓ You will need to have access to the German Ports web interface.
- ✓ You can then use the web interface to generate a PIN for other contractual partners or for the collection of a container.

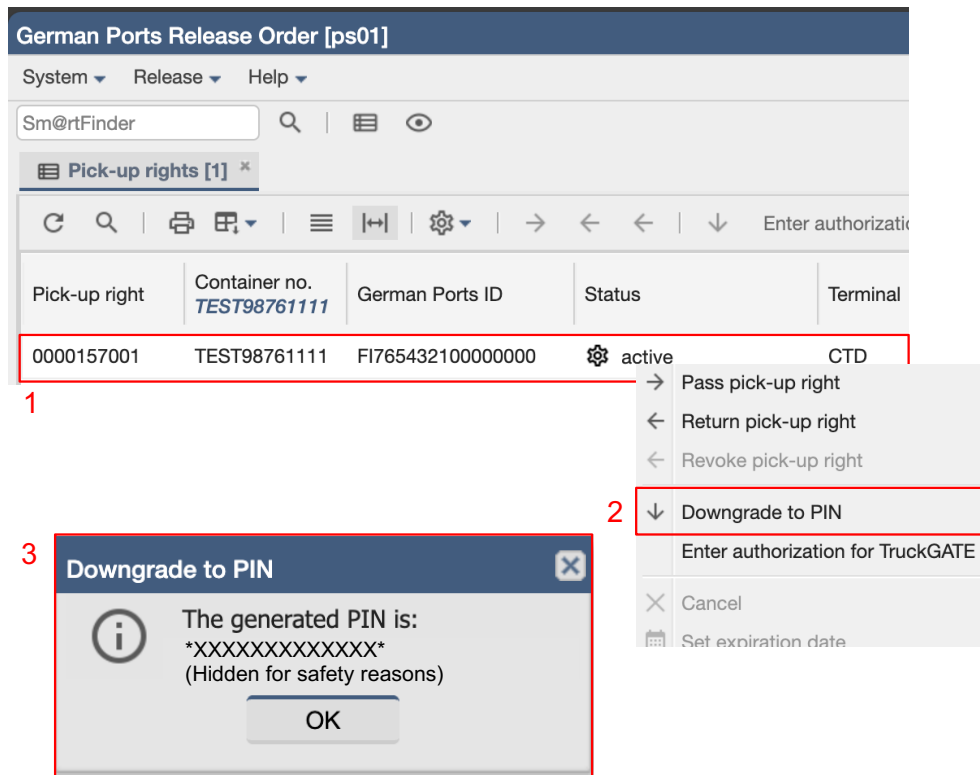

**The PIN generated in this way is not stored in the system and cannot be re-created if lost!**

## You will receive the PIN via the web interface and via E-Mail.

### Via Web interface

The screenshot shows the 'German Ports Release Order [ps01]' web interface. It includes a search bar, a table of pick-up rights, and a context menu for the 'Downgrade to PIN' action.

1. The table shows the following data:

Pick-up right	Container no.	German Ports ID	Status	Terminal
0000157001	TEST98761111	FI765432100000000	active	CTD

2. The context menu for the 'active' status shows the following options:

- Pass pick-up right
- Return pick-up right
- Revoke pick-up right
- Downgrade to PIN
- Enter authorization for TruckGATE
- Cancel
- Set expiration date

3. The 'Downgrade to PIN' dialog box shows the generated PIN:

The generated PIN is:  
\*XXXXXXXXXXXX\*  
(Hidden for safety reasons)

OK

### Via E-Mail

**Subject:** Downgrade-To-PIN for TEST7654321

Dear Sir or Madam,

The following container has been downgraded to PIN-usage and can therefore no longer be processed in the context of Secure Release Order:

Container: TEST7654321

Pick-up right issuer: COO

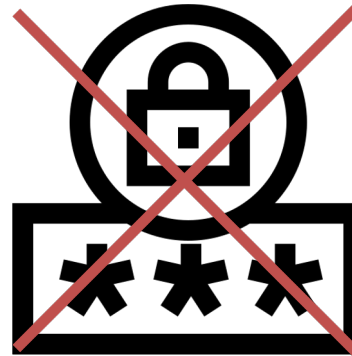

Release order PIN: 2854776370

Timestamp of downgrade: 20250915114907

Best regards,  
Your German Ports Support

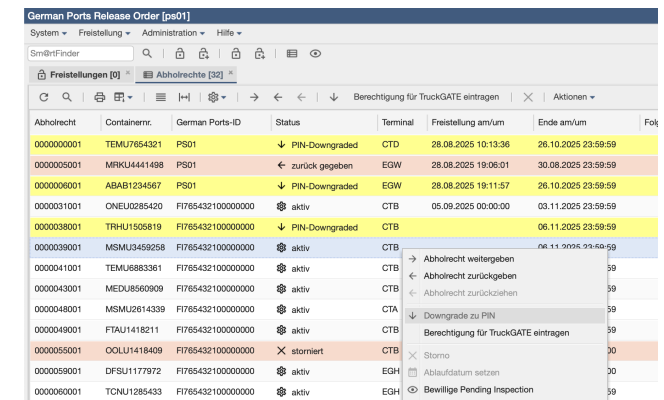

## If you receive transport orders from an Initial Release Party.

- ✓ Register with German Ports in order to be able to receive Pick-Up Rights and generate PINs independently as a freight forwarder.
- ✓ Alternatively, you can also receive the PIN directly from the Initial Release Party, as long as they have previously generated the PIN.
- ✓ Use the time until the complete introduction of the Secure Release Order (SRO) to register in good time and be able to work with Pick-Up Rights in the future without restrictions.
- ✓ Find out about the Secure Release Order introduction at the terminals from 03.11.25.

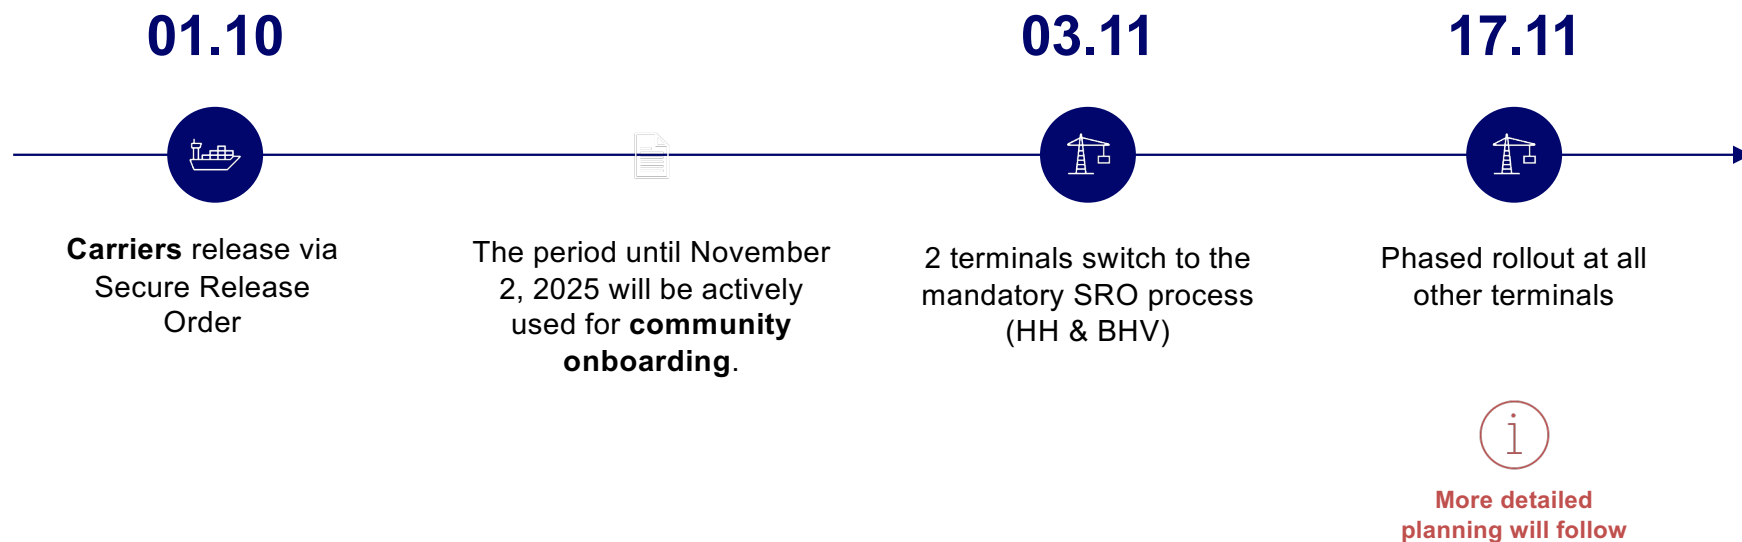

**The PIN will still be able to be used for pick-ups for a short transitional period.**

**The first terminals will switch to Pick-Up Rights from 03.11! Find out more about the changeover at the terminals that are relevant to you!**

**Introduction:** What is changing and why?

02

**Basics:** How does Secure Release Order work?

03

**Go-Live:** How does the transition to Secure Release Order work?

04

**Preparations:** What happens after registration?

# Preparatory measures must be taken.

- 1 Register your company with German Ports**  
via <https://germanports.com/en/registration/>  
This is necessary in order to prepare the contractual and technical requirements.
- 2 Add the necessary master data as soon as you have received your access data**  
This is necessary so that your partners can find you on the platform and assign Pick-Up Rights.
- 3 Training and Guidance**  
Under <https://germanports.com/tutorials/>, we are constantly adding material for training courses and showing all important actions step by step in the web interface.

## FAQ: In which case do I need to register with German Ports?

?

### **Consignee or Forwarder as Initial Release Party (IRP)**

Whether the consignee (B/L recipient) or the freight forwarder is assigned as the initial release party (IRP) depends on the contractual agreement between both parties:

#### **Variant 1: Consignee as Initial Release Party (IRP)**

- Carrier assigns the initial Pick-Up Right directly to the consignee (B/L recipient).
- Consignee manages the releases independently.
- Consignee can then either use the Pick-Up Right themselves or pass it on to a forwarder/subcontractor.
- Prerequisite: Consignee must be registered, otherwise no direct assignment of rights by the shipping company is possible.

#### **Variant 2: Freight forwarder as Initial Release Party (IRP)**

- The consignee transfers the right to the carrier in advance (e.g. with an assignment or power of attorney).
- The carrier then immediately enters the freight forwarder as the initial release party.
- The freight forwarder receives the Pick-Up Right directly and can use it himself or pass it on.
- In this case, only the freight forwarder must be registered.

# Preparatory measures must be taken.

- 1 Register your carrier with German Ports**  
via <https://germanports.com/anmeldung/>  
This is necessary in order to prepare the contractual and technical requirements.
- 2 Add the necessary master data as soon as you have received your access data**  
This is necessary so that your partners can find you on the platform and assign Pick-Up Rights.
- 3 Training and Guidance**  
Under <https://germanports.com/tutorials/>, we are constantly adding material for training courses and showing all important actions step by step in the web interface

Detailed information can be found in the training materials on the website: <https://germanports.com/en/forwarder-and-logistician/#dokus>

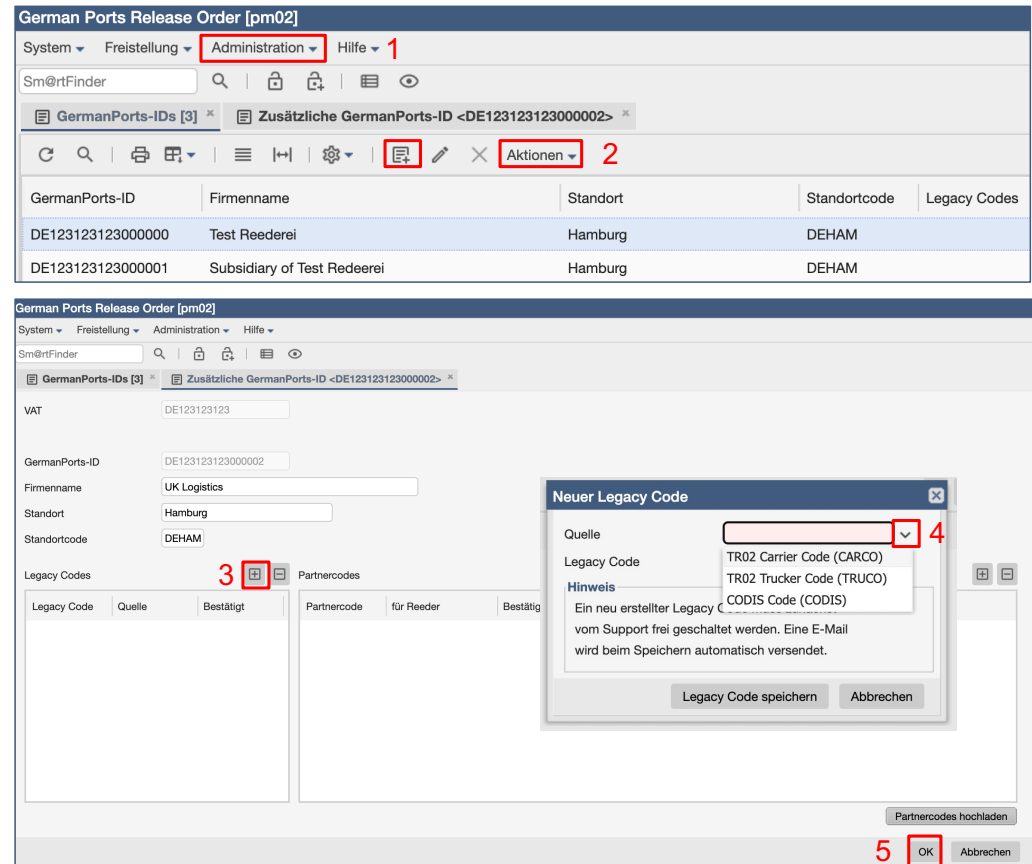

# Master data: German Ports requires all current legacy codes in use by your company.

## Important!

- After registering, you must enter all legacy codes in German Ports that you are currently using.
- Administrators can add, change, or remove legacy codes at any time.

## What are legacy codes?

- Legacy codes are existing codes from the industry, for example: TR02 Carrier Codes, TR02 Trucker Codes, or CODIS.
- These codes link your German Ports ID to the known systems.

The screenshot displays the 'German Ports Release Order [pm02]' interface. At the top, the 'Administration' menu is highlighted with a red box and labeled '1'. Below the menu, a table lists existing legacy codes. The table has columns for 'GermanPorts-ID', 'Firmenname', 'Standort', 'Standortcode', and 'Legacy Codes'. Two entries are shown: 'DE123123123000000' for 'Test Reederei' in 'Hamburg' with 'DEHAM' as the 'Standortcode' and 'Legacy Codes', and 'DE123123123000001' for 'Subsidiary of Test Reederei' in 'Hamburg' with 'DEHAM' as the 'Standortcode' and 'Legacy Codes'. A red box labeled '2' highlights the 'Aktionen' (Actions) column. Below the table, the 'Neuer Legacy Code' dialog box is open, showing a dropdown for 'Quelle' (Source) with a red box labeled '4' next to it. The dialog also includes a 'Legacy Code' field, a 'Hinweis' (Note) section, and buttons for 'Legacy Code speichern' and 'Abbrechen'. A red box labeled '3' highlights the 'Legacy Codes' section in the main interface, and a red box labeled '5' highlights the 'OK' button in the dialog box.

GermanPorts-ID	Firmenname	Standort	Standortcode	Legacy Codes
DE123123123000000	Test Reederei	Hamburg	DEHAM	
DE123123123000001	Subsidiary of Test Reederei	Hamburg	DEHAM	

# Preparatory measures must be taken.

1

## Register your carrier with German Ports

via <https://germanports.com/anmeldung/>

This is necessary in order to prepare the contractual and technical requirements.

2

## Add the necessary master data as soon as you have received your access data

This is necessary so that your partners can find you on the platform and assign Pick-Up Rights.

3

## Training and Guidance

Under <https://germanports.com/tutorials/>, we are constantly adding material for training courses and showing all important actions step by step in the web interface
