

Pending Inspection Status

The *Pending Inspection Status* is used for **Customs (CPA)** or **Veterinary (VET)** inspections.

- During this status, the Pick-Up Right is „frozen“ for the duration of the inspection.
- This means that carriers (and/ or subcontractors) cannot modify, withdraw, or cancel it while the status is active.

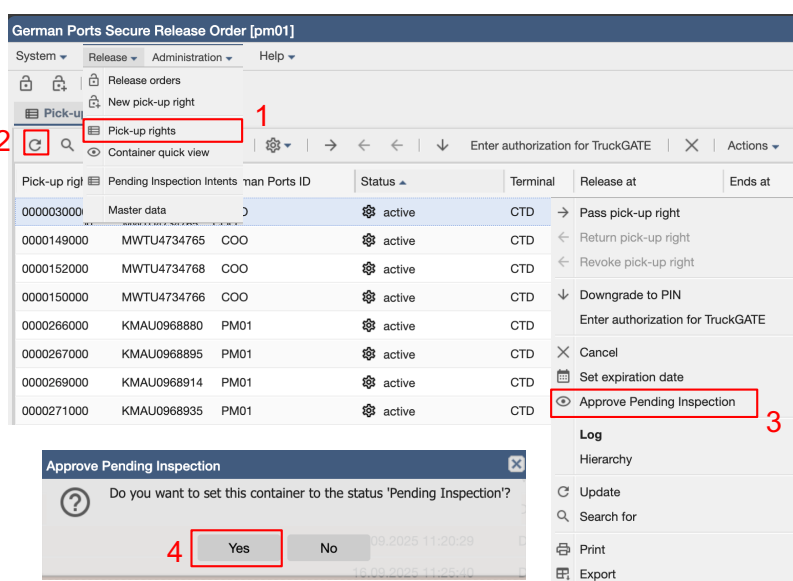

If the terminal is instructed to organise the transport to an inspection **outside the terminal area**, actions by the carrier are required:

- **Option 1:** The carrier proactively gives the permission to allow the terminal to set the status 'Pending Inspection'.
- **Option 2:** The carrier confirms the terminal's request to activate the Pending Inspection Status.

Once the inspection is completed and the container returns to the terminal, the Pending Inspection Status is lifted and the original Pick-Up Right becomes active again.

Option 1: Carrier grants permission proactively

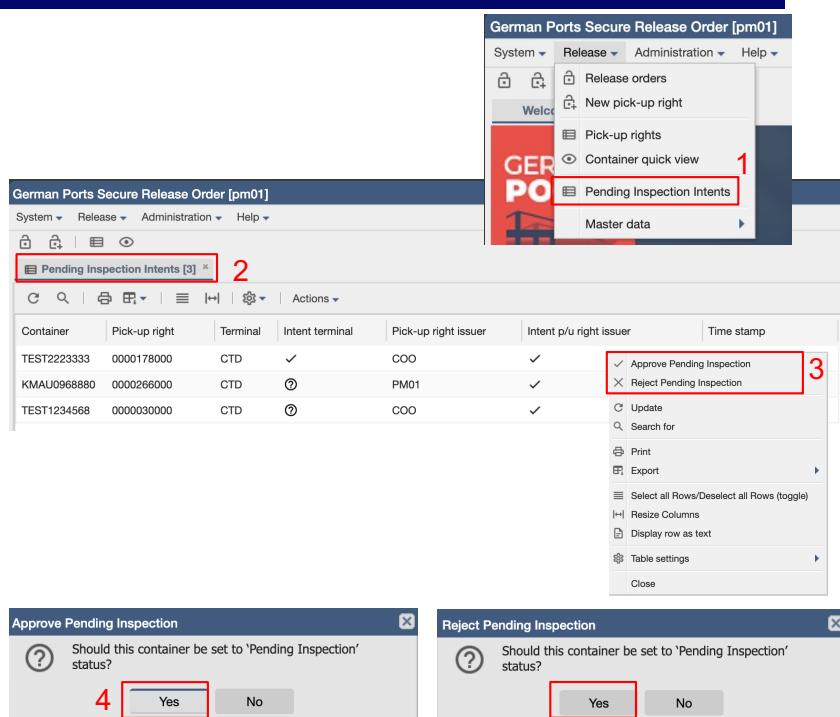

1. Go to the drop-down menu **Release** and click on **Pick-up rights**.
2. A new tab called **Pick-Up Rights** will open, displaying an overview of all existing pick-up rights. If no pick-up rights are visible, refresh the page by clicking "Update" in the shortcut menu.
3. In the overview, right-click on a pick-up right. A context menu will appear. Select "**Approve Pending Inspection**". This will (proactively) grant the terminal permission to set the Pending Inspection Status.
4. A pop-up window will appear, asking you to confirm the action.
5. After confirming, another pop-up window will display a written confirmation of the approval.

Pick-up right	Pending Inspection Intents	man Ports ID	Status	Terminal	Release at	Ends at
000003000	Master data		active	CTD	→ Pass pick-up right	23
0000149000	MWTU4734765	COO	active	CTD	← Return pick-up right	23
0000152000	MWTU4734768	COO	active	CTD	← Revoke pick-up right	23
0000150000	MWTU4734766	COO	active	CTD	↓ Downgrade to PIN	23
0000266000	KMAU0968880	PM01	active	CTD	Enter authorization for TruckGATE	23
0000267000	KMAU0968895	PM01	active	CTD	× Cancel	23
0000269000	KMAU0968914	PM01	active	CTD	Set expiration date	23
0000271000	KMAU0968935	PM01	active	CTD	Approve Pending Inspection	23

Option 2: Carrier confirms or declines the terminal's request

1. Go to the drop-down menu **Release** and click on **Pending Inspection Intents**.
2. A new tab called **Pending Inspection Intents** will open. This tab displays an overview of all pick-up rights that currently have a pending inspection intent, either given by the pick-up right issuer (e.g. carrier) and/or requested by the terminal. Those intents are displayed in the respective columns in the tab.
3. In the overview, right-click on a pick-up right. A context menu will appear with the following options:
 - a) **Approve Pending Inspection**
 - b) **Reject Pending Inspection**
4. After selecting and confirming your intended action, a pop-up window will open displaying a written confirmation.
